

### **Who to ask for help**

If you have concerns that you would like to discuss regarding SEND, this should initially be done through an appointment with the class teacher. If you feel that you have further concerns, an appointment to meet the SENCo, before or after school on a Thursday, can be made through the office.

Medical concerns, for example hearing loss, should initially be referred to your GP or Health adviser. The School Nursing service is also available to help with some issues.

Concerns over behaviour: Yorkley School is able to recommend and access excellent, free parenting courses at a number of local venues. *(Please note that the Consultant paediatrician will often require parents to have completed a parenting course before children are seen by him for behavioural issues.)*
